

Analysis of Auditor General's County Executives' Audit Report.

Citizen led analysis of County Executives'
Auditor General Reports 2016/2017.

– Executive Summary –

The counties have to account for the funds provided to them at the end of each financial year through financial statements to the Auditor-General for audit. The Auditor General is tasked to audit and report, in respect of that financial year on the accounts of the national and county governments. The 2016-17 audit report revealed massive plundering of public funds at the counties. This report examines the findings contained in the counties executive financial audit report published by the Office of the Auditor-General (OAG) for FY 2016-17. The scope of this report highlights the findings for the 46 counties. The findings reveal that citizens are not receiving full value for money in respect to public expenditure management. However, Taita Tavet county executive report was not published.

– Introduction

● Background of Citizen Led Analysis of County Executive Report

The citizen led analysis entails training and creating awareness to citizens on audit issues and corresponding queries raised by Auditor General reports for all the counties.

● Significance of Chambua

The citizen led analysis examines the queries on the financial transactions raised by the Auditor General in the 46 counties and analysis how public funds were managed by the County governments and to which extent counties are adhering *Public Finance Management Act (2012)*. These reports were analysed over the last Financial Year - FY 2016/2017 to provide a trend analysis and provide a training guideline used to analyse the counties' audit report.

● Methodology

The citizen led analysis examined the 46 Auditor General's County Executive reports for FY 2016/2017. Analysis of the audit issues and corresponding queried amounts was conducted through public participation, public engagement as well as conducting interviews with key oversight bodies and stakeholders. Descriptive statistics and visualisation were utilised for summary and representation of the findings.

SOURCE : OAG REPORT FY 16/17

Conclusion —

The Constitution (CoK) and the Public Finance Management (PFM) Act of 2012, provides for the ratio of development to recurrent expenditures of at least 30:70 as set out in the PFM Act. According to the OAG report, the queried amounts as a percentage share of the total recurrent expenditure (i.e wages) for the financial year under review exceeded 70%. This means less than 30% of the county budget has been spent for development. Over half of the amount that was spent for various projects had queries according to the OAG report implying that the expenditures or payments were not lawful and effective as provided by the law. The OAG report further states that some of the issues identified led to failure to achieve value for money, while some related to inaccuracy of financial statements, pending bills & outstanding imprest, yet others are as a result of lack of documentary evidence on particular project or activities.

County governments must ensure that they adhere to PFM Laws, Regulations and Guidances. This is need for urgency in this regard as the success of devolution in Kenya relies on it.

Recommendations —

- County governments should adhere to Section 107 (2)b of the Public Finance Management Act, 2012 that requires that over the medium term, a minimum of 30% of the County Government's budget shall be allocated to Development Expenditure. Therefore the county governments should allocate 30% of the total budget to development and 70% to recurrent expenditure.
- County Government on wages and benefits for public officers should not exceed 35% of the total county total revenue in line with Regulations 25(1) (b) Public Finance Management (County Governments) Regulations, 2015. It is a great concern that big portion of County's revenue remunerates workforce at the expense of development projects.
- All withdrawal from the county collection accounts should done with authority from the Controller of Budget (CoB). The County Treasury is required to obtain a written approval from CoB before withdrawal from County Revenue Fund. (Section 109(5) of the PFM Act, 2012)
- All payments should be made through IFMIS and there should be no variance between IFMIS and bank account statements. Section 93 (5) of PFM Act 2015.
- Accounting officers must use proper documentation and reporting standards recommended by Public Sector Accounting boards, as required in the Public Finance Management Act.
- County governments still lack the comprehensive assets register to record the assets acquired and maintained by the county which is contrary to section 136 (1) of the Public Finance Management Act, 2015. All County governments should therefore have an updated fixed asset register.
- In order to ensure transparency and prudent management of County's resources, all County Governments should have an audit committee in place to oversee governance and promote transparency as provided for in section 155 of the PFM Act 2012 and section 167(1) of the PFM (County government) Regulations 2015.
- Counties must operate a retention fund account in that the as required by the County Government financial reporting manual which requires county treasuries to reserve retention of 10% before expiry of the 6 months' defect liability. This should be strictly adhered to so as to safe guard public money paid out to contractors.
- Rolled over pending bills negates the reason for public participation as projects that were not implemented but rolled over ignores the wishes of the citizens.
- Counties must establish staff recruitment and casual employee's engagement policy to guide in its human resource management as casuals take a significant portion of the budget. Government Human Resource Information System (GHRIS) for HR records, IPPD for Payroll processing should be used to manage the wage bill.
- Public Investment Management (PIM) Guidelines should guide project implementation at the county level
